All figures are manufacture’s data.
The specifications are subject to change without prior notice.
The electric energy consumption and driving range shown in -(*) were measured according to the Worldwide Harmonised Light Vehicle Test Procedure (WLTP) and are intended to be compared with other vehicles tested under the same technical procedure. These values may differ from actual driving results as they vary depend on many factors such as accessories fitted to the vehicle, weather and road conditions, driving styles, and vehicle load.

S : Standard S*1 : Cold regional package - : Not Available

S*1 : Items for cold region package : door mirror heaters, steering heater, rear heater ducts, heated seats and L-shaped de-icer ** : ESP is a registered trademark of Mercedes-Benz Group AG.

The ESP is designed to help keep the e VITARA under control. However, its effectiveness depends on driving conditions and the state of the road surface.

If the tyres exceed their grip limit and the wheels start to spin or skid, it may not be fully effective.

SUZUKI connect

SUZUKI CONNECT is a suite of connected services you can access remotely from your smartphone to monitor your e VITARA's status and control some of its functions.

1 Battery information

Use the SUZUKI CONNECT app to check the battery's remaining charge, cruising range, or average power consumption, as well as the current charging status, charging level, and estimated time to complete charging.

2 Charging status notification

Receive notifications from the SUZUKI CONNECT app when charging starts, ends, or is unexpectedly suspended. This brings you greater peace of mind and gives you the ability to take action if necessary.

3 Low battery notification

The SUZUKI CONNECT app notifies you when the remaining battery charge drops below a user-set level, allowing you to take action to prevent draining the battery.

4 Reservation charging

Make reservations to start and stop charging, and set recurring charging schedules to suit your schedule or to take advantage of times when electricity rates are lower.

5 Low temperature notification/ AC auto ON timer/ Battery precondition

Receive instructions when the ambient temperature drops below -15°C and your e VITARA is parked, and schedule AC operation, with or without battery preconditioning, from the SUZUKI CONNECT app.

6 Trip planning

Search for and set destinations using the SUZUKI CONNECT app, display your route on the e VITARA's integrated display, and receive navigation guidance along the way.

7 Wallpaper customisation

Use the SUZUKI CONNECT app to select images from your smartphone and set them as the wallpaper for the e VITARA's integrated display.

8 Hybrid navigation

Access both online and offline navigation data to view maps, weather updates, and information on availability of nearby charging stations and parking areas.
